SAFETY COMMITMENT:

Every day and every job begins with safety. Embracing strict industry standards is critical for our success – and critical to protect our employees, our contractors and our customers. Safety is not an add-on to our work; it is integrated and embedded into our everyday operations.

WHO WE ARE

DyTerra is a full-service supplier to fertilizer and propane industries across Western Canada, offering everything from small parts to full-scale facilities. We specialize in the distribution and service of NH₃, liquid and granular equipment as well as the design-build of liquid and NH₃ fertilizer facilities and also offer propane servicing and parts.

Ultimately, we can sell it, build it and service it... and we do it all with a number of quality industry and safety certifications. With DyTerra, you can count on a business relationship based on our core values: Positive, Accountable, Continuous Improvement, Fearless Innovation and Everything Matters.

For over 20 years, DyTerra has been a proud partner alongside Western Canada's agricultural community. Whether you come to us for o-rings, delivery units, a 5-year inspection or an NH₃ plant, our team is committed to providing a great experience backed by years of sound knowledge.

- Pat Beavis, Founder and President

STAYING CONNECTED

Our community means a lot to us. That's why we stay in touch through social media, newsletters, trade shows or just a friendly call to see if there's anything you need.

What are we up to? Follow us on social media for tips, updates, sales alerts and industry info.

dyterra.com - Check out our tradeshow page under *Company* to see where you can find us each year!

COME SAY HI!

Our sales and service teams are always happy to help you out in person. We're open from 8:00-5:00 Monday to Friday - stop in and say hi!

NH3

When it comes to ammonia, we've got everything you need! From small parts to large equipment to full plants, we sell, inspect and service it all.

PARTS & EQUIPMENT

We're selling 2000s, Twin 2000s, 2400s and 4725 tanks and wagons as well as 8100-gallon delivery units. Alongside that, we have NH3 application kits and pretty much any part you can think of. Check out our NH3 catalogue online or call us to request a copy!

REPAIRS & UPGRADES

Whether you're looking for tank, hose, meter, valve, pressure piping, R-stamp or any other repairs, maintenance or modifications, we're happy to help out in our shop or in your fields.

INSPECTIONS

Our technicians are certified to handle your Transport Canada inspections and hose tests for delivery units and nurse tanks as well as your storage tank inspections. We also handle your Measurement Canada meter inspections and calibrations.

REMOUNTS & SITES

You could be in the market for a remount or rebuild, need custom fabrication or are ready to build, upgrade, relocate or set up a new site. We can do all of that.

GRANULAR

Whether you need to book service, repairs or upgrades or simply order equipment, our team can help solve your needs.

MAINTENANCE & REPAIRS

Site need maintenance or repair? We'll help you out with belts, gears and pulley maintenance, leg repair, modifications, changeouts or custom welding if that's what you need.

PARTS & EQUIPMENT

We'll order up and deliver your spreaders, tenders, blenders, hoppers, conveyors, bins or smaller replacement parts. If you're ready for a liquid impregnation system, we have a team of specialists - check out the MicroCote panel.

LIQUID

It's important to keep liquid plants flowing – and we have the knowledge and experience to get the job done.

FACILITIES

Whether you need a new plant or an upgrade to an existing one, we can plan out the plumbing, bins and containment systems and install turn-key plants with expert technicians.

PARTS & EQUIPMENT

We custom build your inload and outload pump skids, provide containment systems, and sell a wide variety of replacement parts including pumps, valves and strainers.

REPAIRS & PLUMBING

We're always happy to come out and handle repairs or plumbing upgrades for your liquid sites and skids or take care of rebuilding your pumps.

MICROCOTE

High-quality liquid impregnation systems to support a wide range of blending equipment – whether you're looking for micronutrients, nitrogen stabilizers or dust control oils.

FULL SYSTEMS

With three levels of pump control, customizable controls from manual flow-rate to fully automated batch blending, Legal for Trade options, certified scales, and custom racking, we build the system that fits you.

BASIC SYSTEMS

The MicroCote mini is a small yet simple cone system that's manually operated and provides you with a starter package to get you going - without spending a lot of money.

INSTALLS

Our teams will come on site to install and test your systems, train you on how to use them well and provide you with a detailed manual to keep you going for years to come.

PROPANE

Did you know that even though we specialize in and focus on the fertilizer industry, we also do a lot of work for the propane industry?

BUILDS

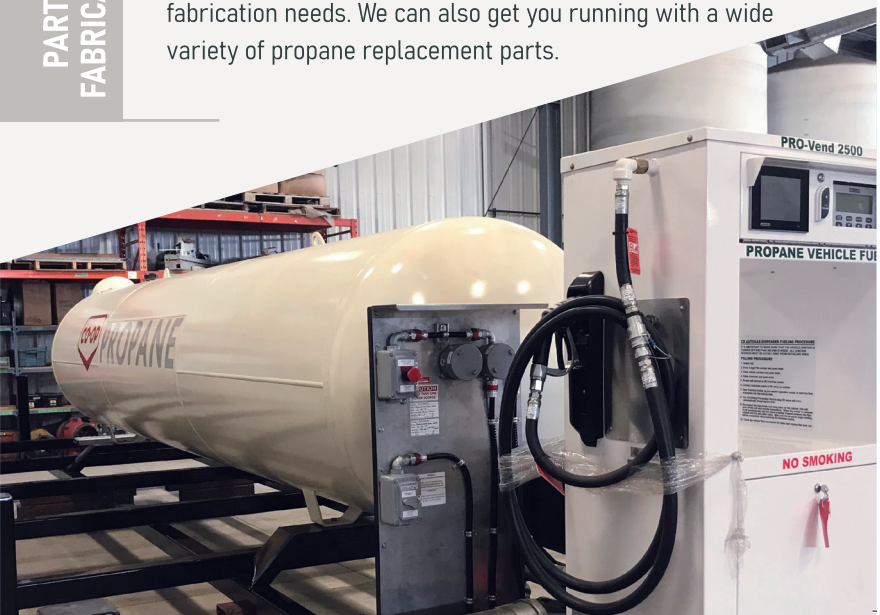

We perform remounts or rebuilds from start to finish, planning through each detail to ensure success. We also build bottle and auto-fill dispensers, guardians and vaporizer stands to suit your needs.

REPAIRS & INSPECTIONS

We can service, repair and perform inspections on your propane vehicles, perform hose tests and certify your meters. We're R-Stamp certified for repairing and modifying tanks and associated piping.

PARTS & FABRICATION

Our CWB-certified welders can handle all your custom fabrication needs. We can also get you running with a wide variety of propane replacement parts.
